## STATISTICS OF INCOME—CALENDAR YEAR 1920.

TREASURY DEPARTMENT,  
OFFICE OF COMMISSIONER OF INTERNAL REVENUE,  
*Washington, D. C., Sept. 20, 1922.*

Hon. A. W. MELLON,  
*Secretary of the Treasury.*

SIR: I have the honor to transmit the following statistical report of economic data compiled from the returns of individuals, corporations, and partnerships reporting net income for the calendar year ended December 31, 1920. There are also included herein tables prepared from capital stock tax returns, 1922, and Federal estate tax returns, 1916-1921.

### RETURNS FILED.

The number of individuals who filed income-tax returns for the calendar year ended December 31, 1920, was 7,259,944. The aggregate net income reported by these returns was \$23,735,629,183, and the tax (normal tax and surtax) amounted to \$1,075,053,686. As compared with 1919, the above figures show a growth of 1,927,184 in the number of returns filed and an increase in the total net income reported amounting to \$3,876,137,735, but a decrease of \$194,576,418 in the total tax.

The number of corporation income-tax returns for the calendar year 1920, other than those of personal service corporations, was 345,595. Of these, 203,233 reported net income amounting to \$7,902,654,813; income tax, \$636,508,292; war-profits and excess-profits tax, \$988,726,351; total tax, \$1,625,234,643.

For the calendar year 1919 the number of corporation returns was 320,198, of which 209,634 reported net income totaling \$9,411,418,458 and tax aggregating \$2,175,341,578.

The aggregate net income and tax reported for each of the years 1917-1920, inclusive, in the returns filed by individuals and corporations are as follows:

Year.	Net income.	Increase or decrease.	Income and profits tax.	Increase or decrease.
1917.....	\$24,382,743,418	.....	\$2,833,938,723	.....
1918.....	24,286,150,604	- 896,592,814	4,286,486,257	\$1,452,547,534
1919.....	29,270,909,906	4,984,759,302	3,444,971,682	- 841,514,575
1920.....	31,638,283,996	2,367,374,090	2,700,288,329	- 744,683,353

## PERSONAL INCOME-TAX RETURNS.

In the following table is visualized the distribution of the personal returns by States and Territories, as well as the per capita income and tax, according to the population reported by the Fourteenth Census of the United States, 1920. As relating to the entire population of the United States subject to Federal income tax, the proportion filing returns was 6.85 per cent. The per capita net income reported was \$223.87 and the per capita income tax was \$10.14.

On the basis of returns filed, the average net income reported for 1920 was \$3,269.40, the average amount of tax \$148.08 and the average tax rate 4.53 per cent.

## INCOME FROM BUSINESS (PERSONAL RETURNS).

The income reported by individuals as having been derived from business, other than from partnerships or personal service corporations, is shown according to industrial divisions in the following table. These data represent only such amounts reported by individuals as were derived from business operations conducted as sole proprietors and do not necessarily indicate the principal occupations of, or the total income reported by, the persons making the returns.

## PARTNERSHIPS AND PERSONAL SERVICE CORPORATIONS.

The revenue act of 1918 prescribes that neither the returns filed by partnerships nor personal service corporations be taxable, but that such income shall be reported for taxation in the returns of net income of the individual members or stockholders, according to their distributive shares, whether distributed or not.

The number of returns of net income for 1920 filed by these two forms of association was:

Partnerships.....	240,767
Personal service corporations.....	5,542
Total.....	246,309

## CORPORATION INCOME-TAX RETURNS.

The table immediately following shows the returns of corporations distributed by industrial groups and segregated according to those reporting net income and those reporting no net income. In the transportation and public utility group, both gross income and general deductions should be approximately twice as much as shown. This is due to railroad and other utility corporations, to a great

extent, reporting on the face of the return merely the amount of net income or deficit.

To have inspected the numerous supporting schedules of these returns for the purpose of compiling the gross income and general deductions was inexpedient, due to the cost and the additional time that it would have required.

### INCOME RETURNS BY STATES.

#### COMBINED PERSONAL AND CORPORATION INCOME AND TAX.

The following table exhibits by States and Territories the combined personal and corporation incomes and income taxes for the calendar year 1920. The amounts do not represent, however, what may be called the geographical distribution of income. The figures are compiled from the returns filed in each State. An individual files his income-tax return in the district in which his legal residence or prin-

principal place of business is located, and a corporation files its income-tax return in the district in which its principal place of business or the principal office or agency is located. Consequently, income reported by an individual or corporation in one State may have been derived from sources in other States.

From the foregoing it will be clear that there is no way of ascertaining from the income-tax returns the amount of income earned in the respective States or the amount of tax paid on that basis.

<sup>1</sup> Compiled from returns reporting net incomes of \$1,000 and over.

<sup>2</sup> Compiled from returns reporting net incomes of \$2,000 and over.

<sup>3</sup> Compiled from returns reporting net incomes of \$3,000 and over.

<sup>4</sup> A minus sign (-) indicates decrease.

In the study of the above table it should be observed that in 1920, 1919, 1918, and 1917 the figures for each source of income are the positive gain items reported, and represent the gross income, less losses and other deductions applicable to each source. Wherever schedules within the returns showed net losses, such losses are included in general deductions, which represent in addition to these losses such other deductions as were not chargeable to any of the sources of income.

The source of income items for 1916 represent gross income, the deductions not having been allocated to the several sources, but reported in lump sum in the returns under the heading "General deductions."

## CAPITAL STOCK TAX RETURNS.

Data compiled from the "Capital stock tax returns for 1922," filed as of July 1, 1921, are presented in the following tables. The same general industrial grouping is used as for the statistics compiled from the returns of net income filed by corporations. The data represent information as reported by 326,100 out of approximately 345,000 returns.

In each of the several tables the number of returns falling under the various classifications are shown, together with the aggregate par value of the common stock, the preferred stock, and the total par value of the common and preferred stock; likewise the fair average value of the capital stock. The law provides that the tax shall be measured by the fair average value of the capital stock of a corporation as of the year immediately preceding the taxable period. In the returns used in this compilation, the fair value is reported for the year, July 1, 1920, to June 30, 1921. The fair average value of capital stock as reflected in these tables is not comparable with invested capital as required for the purpose of the excess-profits tax.

The fair average value of capital stock contemplates the value of the total outstanding stock of the corporation considered as a going concern, and in estimating such value due consideration is given to the net value of the assets, earning capacity, market value of the shares, and other factors that may materially affect values in a given corporation or industry, whereas invested capital for the purpose of the excess-profits tax is based upon the actual investment of the

stockholders in the corporation, irrespective of the present value of the assets.

The tables also show the amount of taxable fair value under each distribution, which is computed by deducting the specific exemption of \$5,000 for each taxable corporation plus the amount of fair value reported by tax-exempt corporations.

The magnitude of corporate industry and the relative importance of each industrial group is clearly shown in Table 1. Of the aggregate fair value of \$75,500,000,000 the manufacturing group reports approximately \$30,500,000,000 or 40 per cent; the next highest is finance, banking, insurance, etc., with \$13,700,000,000 or 18 per cent, followed by transportation and other public utilities, representing \$11,400,000,000 or 15 per cent, after which comes mining and quarrying, \$6,700,000,000 or 9 per cent. The agriculture group reports only \$1,000,000,000 or  $1\frac{1}{3}$  per cent. The largest minor division of the major industrial groups is the manufacturing of metal and metal products, whose aggregate fair value totals in round numbers \$10,500,000,000, representing almost 14 per cent of the aggregate fair value reported by all the returns tabulated.

Table 2 supplements the preceding table and shows in percentages the ratios of the common, the preferred, and the fair value of the capital stock to the total par value of the capital stock, both in the aggregate and by industrial groups and exhibits the relative position of the various industrial divisions with respect to the par value and the fair value of their capital stock. Leading in this respect are the life-insurance companies with a ratio of 273 to 100; this is immediately followed by the group of accident, fire, and marine insurance companies reporting 272 to 100. The "All other insurance" group shows 236 to 100. (For the insurance groups, however, a disproportionately high ratio of the fair value to the par value of the stock is shown, due to mutual or nonstock organizations having been included in the tabulation.) The next in order are the trust companies with 233 to 100, followed by national banks, 209 to 100, and State banks 155 to 100. Lowest in order are the electric railway group with a ratio of 31.75 in fair value to each 100 par value of capital stock.

In the consideration of these data in determining the relationship of the fair value to the par value of the capital stock, the abnormal financial conditions of the period July 1, 1920, to June 30, 1921, should be kept in mind.

Table 3 shows the distribution of the returns according to the size of corporation based on fair value of the capital stock and Table 4 shows the distribution by States and Territories.

The tabulations do not contain returns reporting capital stock with "No par value" and the data are as originally filed and prior to audit and adjustment.

## FEDERAL ESTATE TAX RETURNS.

There are given below tables prepared from the estate-tax returns filed during the period from September 9, 1916, the effective date of the original estate-tax law, up to and including January 15, 1922, the date as of which this statistical analysis was made.

It should be noted that the tables are based on returns actually filed within this period as distinguished from the number of taxable estates in which the decedents died during this period. This distinction arises from the fact that estate-tax returns are not due until one year after death, and, while returns are frequently filed in advance, it results that relatively few returns for decedents dying in the calendar year 1921 had been filed on January 15, 1922.

The estate tax is a tax imposed on the transfer of the net estate of a decedent and is graduated according to the size of the net estate.

In the case of a resident decedent the net estate is the gross estate less the deductions indicated in the table, which include in each case a specific exemption of \$50,000, so that in effect the gross estate of a resident decedent must exceed the specific exemption of \$50,000 plus all other deductions before any tax can result. Returns must be filed for all resident estates where the gross estate exceeds \$50,000. The net estate in the case of a nonresident decedent is the gross estate situated within the United States less the proportionate deductions specified by the statutes. The specific exemption of \$50,000 does not apply to the estates of nonresident decedents, and returns must be filed in all cases where there is property situated within the United States.

The size of the net estate as given in the first column of the tables corresponds to the successive taxable blocks as fixed by the revenue acts.
